MAJOR INFRASTRUCTURE IMPROVEMENTS PLANNED FOR DOWNTOWN INDIANAPOLIS

RebuildIndy is Mayor Ballard's initiative to restore deteriorating thoroughfares, residential streets, sidewalks and bridges, as well as address neighborhood drainage and flooding issues and demolish unsalvageable abandoned homes that pose a public safety threat to neighborhoods.

These construction projects will create local jobs, enhance visitor experience and ultimately increase economic development and public safety for downtown Indianapolis. Safer streets support Mayor Ballard's commitment to make Indianapolis a more livable city.

PROJECT SCOPE

The City of Indianapolis Department of Public Works (DPW) has major infrastructure improvement projects planned for the downtown Indianapolis area. These projects are in addition to the already planned and funded Indianapolis Cultural Trail project, Georgia Street project and Monument Circle Improvements project.

Downtown Indianapolis will benefit from these major infrastructure projects, as well as areas throughout the county. These projects are a part of Mayor Ballard's \$55 million investment in 2010 to improve aging infrastructure throughout Indianapolis. Projects will include complete street resurfacing, traffic signal repair, curb and sidewalk repair, installation of ADA compliant ramps and green infrastructure improvements, including pervious concrete and rain gardens.

Approximately \$9 million in infrastructure improvements is planned for downtown Indianapolis projects. Project construction is planned from fall 2010 through fall 2011. Please see the map on back for project areas.
